Life is Beautiful, a platform of 37 NGOs committed to the defense of life and family at the UN, recommends the following proposals for the CSW 58 Agreed Conclusions:

1. We support the **right to life** of the unborn and the sovereign right of States to safeguard this right. Because every human life warrants protection, we oppose “sexual and reproductive rights” and “reproductive health services”.
2. We call for the insertion of language that affirms the crucial importance of **state sovereignty**.
3. We are in favor of language that underlines the **role of the family** as the fundamental group unit of society. Support for the family is critical for authentic sustainable development.
